## HINTS FOR THE MONTH

September is the month of the Spring Equinox and the celebration of the spring energies in the south. The Sun, Mercury and Venus are all in Libra, the social sign of justice and balance, and all set off the Uranus-Pluto square of radical change and will trigger much shifting in people's lives this month. Make sure you have a good idea of what you hold just and truthful, as it will be challenging for many people and nations around the world. The New Moon itself on 27th September is on that trigger point and we will see great social changes from September. Pluto has also turned direct in mid September and begins an era of change.
